

Care for Tomorrow

Shape the Future!

# FALL / WINTER COLLECTION 2023

For us sustainability is not a trend,  
it is a lifestyle

Lübech Living - since 2009

A photograph of a forest with a white circular overlay containing text. The forest is filled with tall, thin trees, likely pines or spruces, with a dense canopy of green needles. The ground is covered in a thick layer of green moss and fallen branches. The white circle is centered in the lower half of the image, containing the text "Sustainable interior since 2009" in a clean, sans-serif font.

Sustainable

## Our Carefully Selected materials

Lübech Living only work with a few suppliers as we prioritize a very close collaboration with each of them. This way we can follow the process closely and make sure that our products are produced under good social conditions and in an eco-friendly way.

*"We had a dream and  
a mission as early  
as 2009"*

- Søren & Susanne Lübeck

## Care for Tomorrow - Shape the Future!

**Lübeck Living** was founded in 2006. We work within the business of interior, lifestyle, and home decoration. Back in 2009, we turned our full attention to sustainability. Lübeck Living designs and produces our own brands OOhh and OOhhx. We work as the European distributor for **Vance Kitira Candles**, and we are the Nordic distributor for the well-known Italian brand **UASHMAMA**.

**The OOhh Collection** is a unique combination of stylish and timeless Danish design, produced with the use of specially selected sustainable materials.

**OOhhx** is a unique collection in the OOhh range, which is designed and produced with the same values as our OOhh Collection. We produce in countries such as Sri Lanka, Vietnam, and Europe. Common to all our products is that they are all handmade, developed from sustainable materials, and part of a sustainable production. And, of course, always with that extra OOhh detail.

Our customers are always our first priority.

# Sustainable design since 2009

Lübech Living is considered a strong role model in the sustainable interior industry having focused on sustainability since 2009.

We enjoy designing and creating beautiful decor from sustainable materials!

Since 2010 OOhh products have been made in Sri Lanka by strong and proud women working from home earning an important extra income for their family. We are privileged to be part of this project and to witness a positive change in their local area.

Lübech Living

We use the power of the sun to dry our paper products

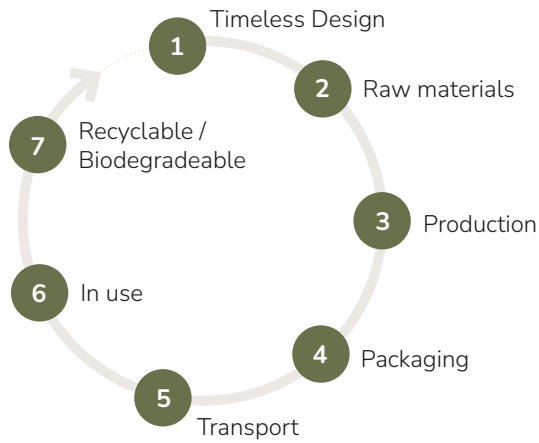

All OOhh products are made by hand and therefore unique

Our paper production is SEDEX SMETA-4 Pillar Certified

## Initiatives towards sustainability

- All our paper pots are biodegradable
- We turn our own excess paper into new paper
- Natural latex is used to waterproof our products
- We dry our paper & paper pots in the sunlight
- We work with less privileged women in Sri Lanka
- To reduce our CO2 footprint we nest our paper pots

The OOhh products are handmade and therefore all unique. As a result colors and sizes may differ slightly from the text and photos.

## A full circle of sustainable thinking

We consider our CO2 footprint in every step from design, to raw materials, production packaging and all the way to its eco-friendly reuse and disposal.

We create products which can be ecofriendly disposed after use.

## Responsible packaging

### 1. Optimized packaging: Eco-nested

Since 2020, several OOhh pots are nested. For products with an Eco-nested symbol, every second pot will be slightly wider, so we are able to nest two pots of the same height to help reduce our CO2 footprint.

### 2. Recycled packaging boxes

The cardboard boxes for our collections are made of recycled paper.

### 3. Your order is shipped in reused boxes

We always reuse boxes from suppliers and other businesses in our area to ship your order. If you receive any plastic filling, please note that it is 100% waste material from other businesses in our area. We only use waste-collected plastic. We hope you will treat the waste with care.

### 4. Recycled box filling

The boxes which are too weak to be reused for packing, we shred and turn into box fillers, which will ensure a safe transport for your goods.

# 1. ZERO WASTE PAPER

We create new paper from local waste paper

In 2018 we realized that despite of our sustainable effort, our production took part in creating 20 tons of paper waste per year. This enticed us to look into new possibilities of re-using our own offcuts.

The result was a new generation of sustainable paper, which we named Zero Waste paper. The softness of the paper is ideal when creating structures and patterns, and we are proud to expand the collection with new designs in the FW23 collection.

# News

## Wood'z

### Made from wood dust

In the pursue to eliminate the use of paint Lübeck Living / OOhh Collection is proud to introduce the new Wood'z collection. The collection is zero waste paper products with a playful wood dust surface.

Using excess wood from the local carpenter industry in Sri Lanka we create the finest wood dust in different colors. By mixing different sorts of local wood we can create several different colors and we have selected our favorite ones for the FW23 season, Light Wood and Ash.

# Why we use recycled paper?

Recycled paper has followed OOHH since 2010. The first OOHH flowerpot was made from recycled paper, and we are still a major fan of the possibility to create stunning decor from such a strong sustainable and biodegradable material.

Recycled paper offers us an interesting base to develop timeless flowerpots and interior, and since we always add that extra 'OOHH' detail you will receive a unique piece of sustainable handcraft.

# The sense of the sustainable lifestyle...

## ... already began in the childhood home

### Small communities showing creativity with their resources

As part of a dance company Susanne and Søren started travelling together as teenagers to destinations in Asia and Africa. Here they quickly discovered how small communities get the maximum out of the limited resources they have available. The use of recycled materials and the craftsmanship of the artisans fascinated them. When returning home they unfortunately also realized that the beautiful products they purchased did not fit into the Scandinavian interior style.

### Sustainability and design must go hand in hand

Back in 2009, when Susanne and Søren decided to focus purely on sustainability and social responsibility they knew that they had to make beautiful Scandinavian designs to make it a success. Sustainability was not a valued asset at that time. Therefore they decided to show the world that sustainability and social responsibility can be united in beautiful design.

For us sustainability is not a trend, it is a lifestyle

### Why sustainability as early as 2009?

Because it made sense. After years of working and doing business in Asia, Susanne was eager to get away from the industrial business standards in Asia. Susanne wanted to work with something more meaningful matching her personal values.

Pure happiness shines from Susanne's eyes when she looks back at everyday life in her childhood home. This is where she was inspired to get the maximum out of all resources and taught to share all of your leftover materials with others. She clearly remembers how the neighborhood came to the garage of the family home to pick up single bolts, nails and pieces of wooden boards. Her father always saved these thinking that every household should not have to buy a full box when only a few was needed.

## We started with Paper Pot, but we also do so much more ...

The OOhh Collection began with recycled paper pots, but throughout the years we have constantly expanded to include a wide range of beautiful interior products. Both the paper pots and the OOhh interior share the dedication towards environmental and social responsibility.

# Mindful Living

Given our climate, there is a demand for conscious behavior, leading to the emergence of the mindful living trend. A trend that makes us decorate with keywords such as 'conscious', 'eco-friendly' and 'timeless'. That reflects our collective desire to create beautiful spaces that are in harmony with the planet and built to last. With the change in trends, to a more reflective and mindful living, the OOhh Interior Collection now stands out stronger than ever before.

What has always been purpose driven designs from OOhh Collection, has now become a trend. Enjoy a large collection of truly stunning baskets, storage options, candle holders and décor items. All handmade by local artisans.

## This is why we use cork

Cork is in the absolute top of the scale as a persistent, reusable and compostable material.

- No trees are harmed in the harvesting of cork
- Cork is a 100% natural material
- Cork is biodegradable
- Cork is renewable
- Cork is recyclable

**i** OOhh Cork Collection is designed to be multifunctional. Use it by itself or in combination with other OOhh and Vance Kitira products.

# Why we decided to introduce ceramics

After we were contacted by the supplier we use today we decided to introduce ceramics. We wish to show the industry that it is possible to produce ceramics in a more sustainable way than the current industry standards.

Our supplier is ISO certified and they use their own solar energy to run the production as well as the water reusing system they have installed.

All products are handmade. The result is a range of beautifully designed ceramic products providing additional possibilities.

ISO Certified ceramics produced with solar energy and waste water

## 5. CERAMICS

All our ceramics are produced with 30% recycled ceramics.

# Why we use recycled glass

The first addition to the OOOhx collection was the range of beautiful mouth blown recycled glass, specially selected from a renowned European glass factory.

OOOhx only use 100% recycled glass as it provides big environmental payoffs. It reduces CO2, saving energy - about 30% less energy is required to melt cullet compared to virgin raw material.

Glass can be recycled endlessly with no loss in quality or purity.

A perfect example of sustainability.

# 9. ZERO WASTE WOOL

## Why we use Zero Waste Wool

In this case we have a fantastic opportunity to use the waste wool from the glerups shoe production. glerups shoes are known for their very high quality of wool which allow us to design the most beautiful wool products. Furthermore a wish of having a local zero waste cooperation came through with this project.

But why is the glerups wool an attractive sustainable material to us? Because it is a 100% pure natural material, antibacterial, 100% biodegradable and has the fantastic qualities of being stain resistant, itch-free and temperature regulating - so it can keep both your coffee warm and your wine cold.

### A cooperation between OOhh & glerups

A dream came true for Lübeck Living when we, together with the Danish company glerups, started our Zero Waste wool project. In this project we reuse excess wool from the glerups production for our lovely Nordic inspired designs.

Susanne Lübeck, OOhh / Allan Timm, glerups

**Ohh & glerups**  
Our passion is felt

## Follow Lübeck Living's sustainable journey

It all started in Sri Lanka with a man saying "I know your candles and I know you care about the environment. I can make recycled paper waterproof". That was the beginning of a lovely collaboration with our Fair Trade project in Sri Lanka.

2010  
We launched the first OOhh Recycled Paper Pots with sand finish made by less privileged women in Sri Lanka.

2009  
Actually it was not in 2010. Vance Kitira already gave us inspiration for sustainable thinking in 2009.

2012  
Lübeck Living were nominated for the Formland Design Award with the innovative OOhh creased paper pot on wooden base.

2018  
We launched the first OOhh recycled glass collection.

2015  
We decided to start a new womens project in Vietnam in line with our Sri Lanka womens project. Resulting in the introduction of the OOhh weaved basket collection.

2013  
We introduced the popular OOhh Eco-Felt made from recycled plastic.

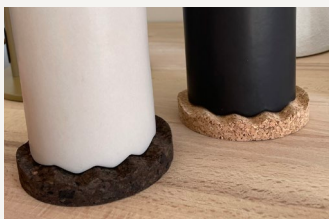

2018  
We developed the unique OOhh Zero Waste paper. Made of leftover paper from our own production.

2019  
We designed our first sustainable ceramic collection produced using solar energy and water recycling.

2021  
We have entered a new collaboration with glerups on their wool waste material.

2022  
After years of considering and researching we introduce the cork material in 2022. We have now had the time to study the cork material and get to know its sustainable profile.

2023  
Mail Me by OOhh. With this new flat packed flower pot we are able to cut down our CO2 footprint and take sustainability in the flower industry to a new level.

2023  
With WOOD'z OOhh have succeeded eliminating the use of paint by using wood dust from the local carpenter industry to create our tactile colors.

We can't wait to see where sustainability will take us next!

## Mindful christmas décor

Presenting the OOhh Christmas collection! Featuring beautiful designs in eco-friendly materials like Pulp paper, Zero Waste paper, EcoFelt, wood, hessian, and Zero Waste Wool.

Experience the holiday spirit with updated traditional shapes and symbols that blend seamlessly with any home décor. Discover the beauty of subtle colors and charming OOhh details.

The OOhh products are handmade and therefore all unique. As a result, colors and sizes may vary slightly from the text and photos.

## Christmas time is candle time

Discover the joy of Christmas with our remarkable collection of clean, pure candles. Just like our loyal retailers, you can curate a delightful assortment that enhances your customers' indoor environment during the holiday season.

Immerse yourself in the cozy glow and gentle flicker of our carefully crafted candles, bringing a touch of festive cheer to your cherished celebrations. Join our esteemed retailers on a journey to evoke nostalgic emotions and craft exceptional moments that will leave lasting memories.

Choose to embrace the enchantment of the holiday season with our clean, pure candles, and embark on a wondrous adventure filled with delightful candlelight.

**“Celebrate Life, Light a Candle” - Vance Kitira**

*Handmade candles*

### Our retailers say:

*“My customers really like the story but especially the colors, long burn hours and the fact that they are allergy friendly are of great importance to them.”*

- Blomstertanken, Gilleleje

*“Customers who start using Vance Kitira candles always come back for more. I have my regular customers who buy the candles because of asthma in the family.”*

- Balsalen, Århus

“As a brand we have seen our image stronger under Lübech Living marketing and distribution.”

*Vance Kitira*

## Certified clean candles

Hand poured certified candles with no emission of harmful or cancer causing particles.

Vance Kitira was established in 1993 by Thai forester Vance Kitira.

The success behind the brand is derived by Vance's own love for nature and his unique ability to translate it into fashionable products, while protecting nature and its inhabitants in return - and the belief that ecofriendly is far from equal to high prices.

*#vancekitiraeurope*

Due to the very pure paraffin the candles are made of, their burn hours are much longer than you will experience with regular candles.

To avoid smoke when putting out the candles, it's important to use the Candle Extinguisher or Candle Snuffer (for taper candles).

# Color inspiration

Enjoy our easy-to-match candles. The textured surface of the candles makes the colors effortless to mix and match. Be creative, use your imagination, or get inspired by our examples underneath, on social media, or on our webshop.

Don't hesitate to reach out if you need guidance to create a beautiful color story that is just right for your audience.
